🎯 Career Objective

A highly skilled and adaptable Front-End Developer with extensive experience in enterprise systems and responsive web applications. Adept at building scalable interfaces with modern frameworks (Blazor, Angular) and leading frontend teams through agile sprints, component architecture planning, and CI/CD deployments. Passionate about optimizing user experience and code reusability while aligning with business goals.

💼 Work Experience

Software Engineer - CGC (Core Group Company) US

Freelance Contractor | Aug 2024 – Present | Remote

- **Eaton Corp. (Multinational Power Management Company) – Internal Web Application Projects**
  - Worked on integrations and project migrations for enterprise-level internal tools used by Eaton, involving web application enhancement and modernization.

Software Developer - IT Consultant – Blackfort PH

Full-time | Aug 2022 – Present | Remote

- **Blackfort HRIS (Internal)** (Feb 2025 – Present) | *Senior Frontend Developer / Tech Lead*
  - An in-house HR system similar to Sprout PH, built to manage employee records, attendance logs and leave management.

- **DPWH – EDMS** (May 2024 – Mar 2025) | *Senior Frontend Developer*
  - An internal system by the Department of Public Works and Highways (DPWH) for storing, retrieving, and managing electronic documents. Focused on improving digital document handling, metadata tagging, and permissions-based access using Fluxor, PDF viewer integrations, and folder-based navigation.

- **DPWH – Ngobia (Asset Maintenance)** (Jun 2023 – Jan 2024) | *Senior Frontend Developer*
  - The system tracks infrastructure assets, integrates maintenance logs, and visualizes geographic and status data for planning and repair of roads, and bridges projects, and inspector features.

- **PSACC** (*Philippine Span Asia Carrier Corp.*) (Aug 2022 – Nov 2024) | *Senior Frontend Developer*
  - The project covers a Booking Management System for cargo reservation and tracking, as well as an Admin Module for vessel scheduling, client management, and operational reporting. Led UI design and integration with backend APIs, with emphasis on modular and reusable components.

Software Developer – SMSI AU

Freelance Contractor | Nov 2019 – Mar 2023 | Remote

- **Shutdown Maintenance System**

  - Angular 9+ SPA for managing project shutdowns, turnarounds, and progress monitoring.
  - Created login module, gantt chart components, and responsive UI with Material + Bootstrap.
  - Built chart-based dashboards, analytical pages using Chart.js, and Excel-like tables via 3rd-party libraries.
  - Developed admin tools for CRUD operations and reusable components using design patterns.

- Azure DevOps for CI/CD pipeline and Git for version control.

Software Developer – Axesscom Philippines - DE

Full-time | Mar 2018 – May 2020 | On-site

- Handled reservations, booking, and event management of club and resto websites under Discotek Germany.
- Used PHP/JavaScript/jQuery for frontend; WordPress for backend and layout customization.
- Implemented device-responsive layouts using Bootstrap and custom CSS.
- Used SVN for source control and Jira for project planning, tracking, and issue resolution.
- Tested page functionalities and coordinated with clients to gather requirements and apply fixes.
- Provided customer support, cost estimation, and ongoing maintenance for deployed modules.

Frontend Developer – IP Tech

Freelance Contractor | Jan 2018 – May 2018

Web Developer Intern – Enigma Technologies

OJT | Sept 2017 – Mar 2018 | On-site
